

What Is Claimed:

1. An animal exercise disk comprising: an upper surface and a lower surface;
and a means for attaching said disk to a hub;
5 wherein said disk is contoured to conform to the shape of said hub.

2. The exercise disk according to claim 1 wherein the hub is selected from an
shelter, feeding apparatus, liquid reservoirs, activity equipment, and challenging
entertainment apparatus.

3. The exercise disk according to claim 1 wherein the contour of the center
portion of the disk slopes downwardly away from the center, transitioning in the
exterior portion of the disk to slope upwardly.

4. The exercise disk according to claim 1 wherein the contour of the center
portion of the disk is contrary to the contour of the exterior portion of the disk.

5. The animal exercise disk according to claim 1 wherein the means for
attachment is a pin centrally located on the lower surface of the disk.

6. The exercise disk according to claim 1 wherein the contours are selected from
contours produced by strait, arched, elliptical, parabolic, radiused or spline lines.

7. The exercise disk according to claim 1 wherein the disk is made from a
material selected from the group consisting of wood, plastics, or metals.

8. The exercise wheel according to claim 1 wherein the surface of the disk is
textured.
